### General Remarks

The soil of the N½ of this Township is generally good lies handsomely rolling; well watered & but for the scarcity of timber could be easily brought under cultivation. This however can be supplied from the neighboring swamps. The S. part of the Township being in part heavily timbered. Honey creek runs through this Township from North to South, & for the distance of

T. 33 N. R. 7 W. 2<sup>nd</sup> Mer. Ind<sup>a</sup>.

5 miles a brisk & handsome stream & will probably afford useful waterpower. It spreads as soon as it reaches the swamp, bordering on the river and its channel is lost, which is the situation of all streams below Crooked Creek and above the West boundary of this Township. Not any of them communicate with the river through a distinguishable channel.

I hereby certify that in pursuance of a contract with M. S. Williams Surveyor General of the United States for the states of Ohio, Indiana & the Territory of Michigan dated 3<sup>d</sup> of May 1834 and strict conformity to the laws of the U. States & the instructions of said Sur. Genl. I have surveyed and subdivided into sections, Township 33 North in Range 7 West 2<sup>nd</sup> Meridian in the state of Indiana. And I do further certify that the foregoing are the original field-notes of said survey & subdivision executed as aforesaid.

Certified the 14<sup>th</sup> of January 1835.
